ANTALYA

✓ Antalya; is a port city on the Mediterranean coast of Turkey. It was formerly known as Adalya and to medieval Europe as Satalia. Picturesquely situated on steep cliffs overlooking the Gulf of Antalya, the city is third in importance of Turkey's Mediterranean ports, after Mersin and Iskenderun. The harbor is not deep however, and only ships of very shallow draft can put into the port. All others must anchor in the roads and be served by tender.

✓ In recent years the growth of tourism has opened new avenues of development. Except for the excessive heat of July and August, the climate is mild and sunny throughout the year. The city's seclusion from industry, its miles of beaches, its palm-shaded streets and parks, and the great wealth of relics of classical antiquity in its vicinity have accelerated its conversion into Turkish "Riviera."

ROLE DESCRIPTION

✓ *Break Up The Barriers*, in collaboration with municipalities, NGOs and rehabilitation centres, aims to provide disabled people necessary knowledge and skills by workshops and activities delivered by interns to broaden their horizons and empower them for their steps in the future. By the project also the general society will gain awareness about disabilities issues to help them integrate better into society.

*Break Up
The Barriers*

*Break Up
The Barriers*

MAIN ACTIVITIES

- ✓ *Interns will deliver workshops and activities to children or adults regarding their cultures.*
- ✓ *Interns will participate in cultural activities.*
